Bronwyn Ryrie Jones

Responsive Teaching in *Primary Mathematics*

Year-long partnership | 2027

Overview

Responsive teaching in mathematics relies on careful implementation work – from curriculum mapping, to unit development, to sequencing and teaching.

Through this year-long partnership, you'll work with our curriculum team to drive improvements in how you plan, teach and assess primary mathematics.

Available only to primary schools in wider Metropolitan Melbourne and Geelong.

Who is this partnership designed for?

This partnership is designed for primary schools who want to:

> improve aspects of mathematics planning, teaching and assessment
> examine current curriculum mapping (including alignment to the 2.0 curriculum)
> engage in classroom observations to explore current practices
> set focuses for professional development
> implement explicit and responsive teaching
> explore the power of daily, weekly and monthly reviews

Partnership structure

This partnership comprises one full day of professional learning for your staff (on-site at your school) and 5 follow-up days of targeted implementation support.

Term 1	Term 2	Term 3
Responsive Teaching in Mathematics (1) Full day of whole staff professional learning 9.00am - 2.30pm	**Implementation support day (3)** Tailored, on-site support to build staff knowledge through coaching, modelling and planning. 9.00am - 1.30pm	**Implementation coaching (5)** Tailored, on-site support to build staff knowledge through coaching, modelling and planning. 9.00am - 1.30pm
Observing, orienting & goals (2) A day of structured learning walks, observations and leadership debriefing 9.00am - 1.30pm	**Implementation coaching (4)** Tailored, on-site support to build staff knowledge through coaching, modelling and planning. 9.00am - 1.30pm	**Implementation coaching (6)** Tailored, on-site support to build staff knowledge through coaching, modelling and planning. 9.00am - 1.30pm

What do current partners say?

"Brydon has built strong connections with our staff through her practical and collaborative approach. Working with her has strengthened our understanding of effective maths instruction, and has supported us to develop a more purposeful scope and sequence."

Mel McGeoch
Learning Specialist, Frankston Primary School

Sample of past partner schools

> Athol Road Primary School
> Carnegie Primary School
> Frankston Primary School
> Glen Waverley Primary School
> Ivanhoe East Primary School
> Manorvale Primary School
> Mount Evelyn Primary School
> Solway Primary School
> Springside Primary School
> Toorak Primary School

Meet the team

Brydon O'Neill-Guy joins Bron's team to provide specialist knowledge in all Primary Mathematics partnerships. Brydon is a Mathematics curriculum specialist and a practising Instructional Coach.

Brydon brings outstanding practical and theoretical knowledge to her work. Brydon holds qualifications in both Education and Speech Language Pathology, and has deep expertise establishing systems of tiered instruction to ensure all students. Brydon recently led F-6 Mathematics in a large metropolitan school in Melbourne, overseeing outstanding results. Her leadership of mathematics was highlighted recently by the Diverse Learner Hub in Victoria.

Bron Ryrie Jones supports Brydon in planning and coordinating all partnerships. While Brydon will work closely with you on the ground, Bron provides strategic oversight, working closely with the team to ensure your aims are met.

Bron and Brydon communicate regularly throughout the duration of the partnership, designing any additional materials/resources or readings that we think will support your school to reach its strategic aims.

Kate McCully, our wonderful Programs Manager, provides full coordination of all partnerships.

Supporting resources and materials

Throughout the partnership, you will be provided with full access to all:

- > Workshop slides
- > Handouts
- > Observation templates
- > Professional readings and resources

Apply for a partnership

Responsive Teaching in Mathematics partnerships are strictly limited to 10 schools per year.
